

# Wax Ka Badelka Mashiinka Wax jara ee Khatarta ah

Maarso 2023

**Fiiro gaar ah:** Loo shaqeeyaasha, kormeereyaasham iyo shaqaalaha adeegsada mashiinka wax jara

Ganacsiga dhismaha doomaha ka samaysan almooniyaaamka, farsamo guud laakiin khatar badan waa in lagu xiro mashaarta afaysan mashiinka wax jara si loogu jaro biraha looguna afeeyo biraha dhabarka danbe ee alxanka (oo sidoo kale loo yaqaano "simida qaybta danbe ee alxanka").

Isbadelkaan ayaa abuuraaya khatarta faniinada kusoo laabta qofka oo khatar u gelinaaya shaqaalaha dhawaacyo iyo naafo. Xaqiqidii, Waaxda Badqabka iyo Caafimaadka Shaqada (Division of Occupational Safety and Health (DOSH) ayaa dhawaan baartay dhacdo isbadelkaan khatarta ah uu keenay in birtu si xun u goyso gacanta xubin kamid ah shaqaalaha ilaa isbitaal la dhigay.

## Qaabab kahortaga

Ku biloow akhrinta buuga tusmada ah s aad u ogaato haddii shirkada qalabka samaysay ay ogolaato miishaaraha lagu xiro mashiinka. Sidaan samee kahor intaadan iibsan ama adeegsan, xataa haddii miishaartu u muuqato mid si fudud u leeg mashiinka. Haddii aan buuga tusmadu sheegin miishaaraha ilkaha leh, ha iska qiyasim in miishaarta lagu xiri karo, waa inaad toos ula xariirtaa shirkada samaysay qalabka.

- Haddii shirkada qalabka samaysay ay ogolaato farsamadaam, ka codso waraaq ama iimeel si aad ugu haysato diiwaankaaga.
- Haddii miishaar gaar ah la ogol yahay, xaqiji in RPM ka miishaarka iyo godka xagashu ay isleeyihiin.

Hubi inuu jiro qaab kale oo ka badqab badan. Tusaale, raadi qalabka sida gaarka ah loogu sameeyay jarista talfiiqyada alxanka. Waa inuu leeyahay gaashaan kaa celinaaya miishaarta haddii ay kasoo boodo meesha.

Waa inay maraan tababarka badqabka kahor intaan shaqaaluhu adeegsan qalabka. Baro sida qaab sax ah loogu adeegsado qalabka, sida loogu xiro gaashaanka

Mashiinnada alxanka ee lagu xiray miishaarta afaysan \*sida halkaan ka muquata) waa inaan loo adeegsan jarista, simida, ama gaabinta. Miishaarta banaanka taala ayaa caan ku ah inay dib u soo boodo ayna sababto dhaawacyo xunxun \*jaris qoto dheer iyo gacmo goys) ku dhaca madaxa, gacmaha, garbaha lugaha, iyo xataa dhexda.

miishaarta, isticmaalka qasabka ah ee difaaca indhaha iyo qalabka kale ee difaaca shaqsiga ah (PPE), sida loo tababaro wajiga, gacmaha, garbaha, iwm, si looga ilaaliyo inay taabtaan miishaarta haddii ay soo boodo, iyo khataraha kale ee badqabka (tusaale, faniinada).

Waxaa intaas dheer, loo shaqeeyaashu waa inay aqoonsadaan ayna xaliyaan dhammaan khataraha kale oo qayb ka ah Barnaamijkooda Kahortaga Shilalka (Accident Prevention Program (APP)) ee qoran ee qasabka ah iyo, marka ay qusayso, barnaamijyada kale ee badqabka. Khatarta shaqada ama qiimaynta badqabka ayaa kaa caawin karta aqoonsiga khataraha si sugar oo hufan.

U sheeg arintaan dadka kale ee ku shaqeeya mashiinka miishaarta alxanka.
